bevsshots

Love drinks? So much so that you wish you could immerse yourself in one? Well, now you can come as close as possible to that experience with [BevShots](#), prints of beer, wine, cocktails, and sake (pictured above) photographed under a microscope. These beautiful abstract images, brought to you by the guy from the Molecular Expressions Cocktail Collection, are about as wine/beer/cocktail geeky as you can get. Especially when viewed via the iPhone catalog app.
